

Imperfex V 25 PG

Waterproof insole-cover, one side thermoplastic adhesive

Thickness: 0.50 - 0.60mm

Application: The lasted upper has to be primed with a PU-based adhesive. Allow appropriate drying time.

This insole-cover needs a temperature of 80°C on the adhesive-side. The temperature of the lasting cement has to be above 80°C as well to reach best bonding on the backside. Press immediately after heating-up.

The temperature of 80°C can be reached by a shockheater at a time of 7 seconds. To get the same temperature at the lasting margin we recommend a dwell time of 10 seconds.

Sheet size: Approx. 1,50 x 1,00m

Manufacturers warranty: Due to the great number of materials being used for shoe manufacturing the possibilities of chemical reactions and incompatibilities between components should be always tested beforehand. We are not liable for damages arising by non observance of our instructions for applications or from reactions beyond our influence and control.

Storing: Under normal conditions the storage is unlimited. Avoid direct storing in the sun. We guarantee for the goods 6 month after delivery date.
